Investment Proposal

Thank you for considering Investment Solutions. Your financial adviser constructed this quote in accordance with your financial needs and investment objectives. It provides a summary of your investment: the selected collective investment scheme portfolios (unit trust portfolios), asset allocation and charges.

Unit trusts are appropriate for investors who wish to boost their savings through monthly (recurring) contributions or a single investment (lump-sum amount). They are convenient and flexible: when your needs change, you can switch your unit trust portfolio/s; increase, stop or decrease your debit order; or make withdrawals without incurring penalties – subject to the terms and conditions.

Other expenses and transaction costs	1.07%
Total investment charge	1.64%
Annual administration charge	0.00%
Total charge	1.64%

We show the total investment charge for the above portfolios and classes of participatory interest only. For detailed information on the charges of the underlying portfolios, which includes transaction costs and the total expense ratio, please refer to the attached Minimum Disclosure Documents (MDDs).

The above total investment charge percentage shows the total costs related to charges, levies and fees incurred in managing the portfolio. A higher total investment charge does not necessarily imply a poor return, nor does a low one imply a good return. The current total investment charge cannot be regarded as an indication of future total investment charges.

The total charge is an aggregate of your selected portfolios' charges, excluding the annual adviser charge. The total charge calculation excludes any amounts to be phased-in. If you have selected to make a lump sum and a debit order investment, the debit order is excluded from the total charge.

Asset allocation

The information provided is based on the latest available portfolio data. The asset allocation, equity sector allocation and underlying investment manager allocation will vary over time depending on market conditions and the Investment Solutions investment process. The portfolio allocation you have chosen will vary as a result of a number of factors and Investment Solutions will not automatically rebalance your portfolio selections to your initially selected weights.

Important information:

Attached to this investment proposal is the Minimum Disclosure Documents (MDDs) for the portfolio/s you have selected to invest in.

We recommend you review the MDDs to understand the characteristics of the portfolio/s you are investing in. Please contact your financial adviser or our contact centre if you have any questions about the MDDs.

Collective investment schemes (unit trusts) are generally medium- to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The manager does not provide any guarantee, either with respect to the capital or the return of a portfolio. Different classes of participatory interests (units) apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the manager, or is available on our website: <https://sa.investmentsolutions.co.za/Products-Services/Individual-Investments-Unit-Trust-Fees>.

Portfolio-specific disclosure statements are reflected in the MDDs. You can obtain additional information on the proposed investment, free of charge, from brochures, application forms and the annual report and any half-yearly report, which are available on our website <https://sa.investmentsolutions.co.za/Products-Services/Individual-Investments-Unit-Trust-Forms>.

The complaints policy and procedure, and the conflicts of interest management policy are available on our website <https://sa.investmentsolutions.co.za/Risk-Compliance/Corporate-Governance>.

Associates of the Manager may be invested within certain portfolios, and the details thereof are available from the Manager.

Disclosures

1. This percentage of the value of the portfolio was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. The investment fee has not changed and is inclusive of VAT. We therefore expect the TER to stay the same. A higher TER ratio does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TERs.
2. This percentage of the value of the portfolio was incurred as costs relating to the buying and selling of the assets underlying the portfolio. TC are a necessary cost in administering the portfolio and affect its returns. It should not be considered in isolation as returns may be affected by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager and the TER.
3. This percentage of the portfolio was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.

Collective investment schemes (unit trusts) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending. The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The Manager does not provide any guarantee, either with respect to the capital or the return of a portfolio. Different classes of participatory interests (units) apply to these portfolios and are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager, or is available on the website <https://sa.investmentsolutions.co.za/Products-Services/Individual-Investments-Unit-Trust-Fees>.

Forward pricing is used. Annualised returns are period returns re-scaled to a period of one year. This allows investors to compare returns of different assets that they have owned for different lengths of time. All period returns greater than one year have been annualised. Returns for periods less than one year have not been annualised.

Foreign securities within portfolios may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information.

Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

Lump-sum investment performances are being quoted. Income distributions, prior to deduction of applicable taxes, are included in the performance calculations.

NAV to NAV figures have been used for the performance calculations, as calculated by the Manager at the valuation point defined in the deed, over all reporting periods.

Investment performance calculations are available for verification upon request by any person. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date.

The performance is calculated for the portfolio and is sourced from the Statpro Performance and Attribution system. The individual investor performance may differ, as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The rate of return is calculated on a total return basis, and the following elements may involve a reduction of the investor's capital, interest rates, economic outlook, inflation, deflation, economic and political shocks or changes in economic policy.

Prices are published daily in the Business Report (South Africa's National Financial Daily) and are made available on our website <https://sa.investmentsolutions.co.za/Download-Centre/Daily-Unit-Prices>.

Actual annual figures are available to the investor on request.

The portfolios are valued at the end of the day using the latest available prices at close of business, and the transaction cut-off time is 13h00.

You can obtain additional information on the proposed investment, free of charge, from brochures, application forms and the annual report and any half-yearly report, which are available on our website <https://sa.investmentsolutions.co.za/Products-Services/Individual-Investments-Unit-Trust-Forms>.
